ABT GOLF VI/GTI/GTD/R

ANMP0235-1

MORE POWER. MORE FUN. GUARANTEED.

ABT ENGINE TECHNOLOGY

The aspiration to bring out the best in every engine is part of ABT's family tradition. When it comes to increasing power output by optimizing the engine management system by means of chip tuning (**ABT POWER**) we are in our element and clearly the world's number one for cars from the VW Group. And thanks to the wealth of experience we have acquired in our many years in professional racing, we are fully aware that it's not only power that is important but durability, too. **More power. No change of emissions category.** Despite the increase in power, your CO₂ emissions do not increase! And your car remains in the same emissions category as before.

ABT AERODYNAMICS

If you rate extraordinary dynamics as high as individuality, then you have found the perfect pit crew in the ABT team. Our designers, engineers, technicians and model makers work hand in hand, and the result is definitely highly respectable: a tuning program developed by our company, from the front grill to the rear wing, which we can use to transform your series production vehicle into an impressive character performer.

ABT EXHAUST TECHNOLOGY

Impressive power is turned into optical and acoustical enjoyment: Thanks to extensive development work and double-walled stainless steel design, ABT exhaust systems and rear mufflers always put on an impeccable performance. The particular masterpiece: diesel rear mufflers specially designed for selected cars which make the diesel models' usually rather subdued voices considerably more impressive.

ABT SUSPENSION

It is only the right suspension that makes higher engine power pure pleasure. Also in this field we bring our entire racing experience and hence absolute cutting-edge technology onto the road. ABT suspension springs lower the vehicle and provide for dynamic looks and more stable road holding. In addition, ABT adjustable sport suspensions can be adjusted in height and, depending on the version, also in rebound and compression. For more safer and comfortable driving pleasure made by ABT.

ABT BRAKES

Driving in a sporty way is great fun but only if you know for sure that any time you want you can bring your car to an immediate standstill. ABT steel-flex brake lines are tested constantly under severe conditions and therefore provide this feeling of certainty. With an ideal pressure point, excellent regulable application and an optimal braking distance – but with significantly less fading, in other words: no decrease in braking power under long-term stress. Thus, ABT brake systems bring everything reliably to a standstill. Except, of course, your driving pleasure.

ABT SPORTS WHEELS

Elegant or dynamic, modern or classical, silver or titanium – but always professionally balanced down to the last detail as far as weight and handling are concerned – ABT sports wheels perfectly round off the individual performance of your car. After all, they clearly show at a glance that they conform with the highest of demands both on the road and on the racing track and that they do not only look good but also want to be driven.

THE ABT GOLF.

A CLASSIC TAKES OFF.

What more can one say about a car that has been one of the most successful models of all time over the past three and a half decades and after which an entire class of vehicles is named? Perhaps that the latest generation of this state-of-the-art Volkswagen Golf lays down the benchmark in every respect – and that despite this fact, ABT has once again succeeded in applying the perfecting touches: dynamically elegant bodywork components, the very finest in automotive technology and an impressive hike in the engines' power output put this 'classic car' in a class of its own, enabling this German legend to once more take off where we at ABT last left off. And the same goes for efficiency, too: for example, after undergoing the ABT treatment, the works 1.4 TSI, 122 hp engine now outputs a genuinely powerful 160 hp. In so doing, it matches the performance ratings of the next step up on VW's standard power-output ladder for its 1.4 TSI unit – while offering a significant reduction in fuel consumption at the same time.

ABT BR sports wheel. Diamond-machined, deepblack painted or high-gloss polished, with optional concealed valves, weight optimized and providing perfect handling.

ABT CR sports wheel. Diamond-machined and mystic anthracite matted. Light, confident, perfectly formed and infinitely powerful.

ABT rear skirt set. The crowning glory for a uniquely sporty profile.

ABT front skirt. Energy-laden exclusivity in OEM quality.
