## ABT POLO

# MORE POWER. MORE FUN. GUARANTEED.

## THE ABT POLO.

### FROM NOW ON: TOP CLASS!

210 km/h top speed, 220 Nm, from 0 to 100 km/h in less than nine seconds. And not only that, a look which makes you look twice that you just can't get enough of. The new ABT Polo – for example the 1.2-litre TFSI version, looks so classy, so self-confident, so sporty, dynamic and, last but not least, so incredibly adult. And all that without losing anything of this small car's charm and effortlessness. Whether top class or just simply brilliant – this original from Kempten is going to write history in the hearts of all real car enthusiasts.

ABT Z sports wheel.  
One-piece casted and titanium matt painted.

ABT rear skirt set with twin-pipe muffer and top piece in carbon look – for perfect aerodynamics and a racy appearance.

ABT carbon foil set – breaks with the norm, looks brilliant on the 3-door model.

ABT rear spoiler in carbon fibre look – pure exclusiveness and individuality, in OEM quality.

### ABT ENGINE TECHNOLOGY

The aspiration to bring out the best in every engine is part of ABT's family tradition. When it comes to increasing power output by optimizing the engine management system by means of chip tuning (**ABT POWER**) we are in our element and clearly the world's number one for cars from the VW Group. And thanks to the wealth of experience we have acquired in our many years in professional racing, we are fully aware that it's not only power that is important but durability, too. **More power. No change of emissions category.** Despite the increase in power, your CO<sub>2</sub> emissions do not increase! And your car remains in the same emissions category as before.

### ABT AERODYNAMICS

If you rate extraordinary dynamics as high as individuality, then you have found the perfect pit crew in the ABT team. Our designers, engineers, technicians and model makers work hand in hand, and the result is definitely highly respectable: a tuning program developed by our company, from the front grill to the rear wing, which we can use to transform your series production vehicle into an impressive character performer.

### ABT EXHAUST TECHNOLOGY

Impressive power is turned into optical and acoustical enjoyment: Thanks to extensive development work and double-walled stainless steel design, ABT exhaust systems and rear mufflers always put on an impeccable performance.

### ABT SUSPENSION

It is only the right suspension that makes higher engine power pure pleasure. Also in this field we bring our entire racing experience and hence absolute cutting-edge technology onto the road. ABT suspension springs lower the vehicle and provide for dynamic looks and more stable road holding.

### ABT BRAKES

Driving in a sporty way is great fun but only if you know for sure that any time you want you can bring your car to an immediate standstill. ABT steel-flex brake lines are tested constantly under severe conditions and therefore provide this feeling of certainty. With an ideal pressure point, excellent regulable application and an optimal braking distance – but with significantly less fading, in other words: no decrease in braking power under long-term stress. Thus, ABT brake systems bring everything reliably to a standstill. Except, of course, your driving pleasure.

### ABT SPORTS WHEELS

Elegant or dynamic, modern or classical, silver or titanium – but always professionally balanced down to the last detail as far as weight and handling are concerned – ABT sports wheels perfectly round off the individual performance of your car. After all, they clearly show at a glance that they conform with the highest of demands both on the road and on the racing track and that they do not only look good but also want to be driven.
