ABT CR sports wheel.
Diamond-machined and mystic anthracite matted.
Light, confident, perfectly formed and infinitely powerful.

THE ABT RS6.

LEAVE ORDINARINESS FAR BEHIND YOU!

As Ingolstadt's most powerful performer certified for use on an everyday basis, the Audi RS6, even in ex works condition, brings breathtaking performance onto the road. In this case, even ABT cannot re-invent the wheel – but we can ensure that it revolves even faster: at a top speed of up to 340 km/h to be precise. Phenomenal **700 hp** and powerful **800 Nm** make this possible. Add to this an optical appearance that confidently meets the ideal. That's just how simple it is to leave ordinariness behind you.

MORE POWER. MORE FUN. GUARANTEED.

ABT ENGINE TECHNOLOGY

The requirement to bring out the best in every engine is part of ABT's family tradition. Where performance upgrades and optimization of the motor management via chip tuning (**ABT POWER**) are concerned we are in our element and clearly the world's number one for cars by the VW group. Thanks to the experience we have acquired in our many years of professional racing, we are aware that not only power is important, but also durability. **More power. No change of emissions category.** Despite the increase in power, your CO₂ emissions do not increase! And your car remains in the same emissions category as before.

ABT AERODYNAMICS

If you rate extraordinary dynamics as high as individuality, then you have found the perfect pit crew in the ABT team. Our designers, engineers, technicians and model makers work hand in hand, and the result is definitely highly respectable: a tuning program developed by our company, from the front spoiler lip to the rear wing, which we can use to transform your series production vehicle into an impressive character performer.

ABT EXHAUST TECHNOLOGY

Impressive power is turned into optical and acoustical enjoyment: Thanks to extensive development work and double-walled stainless steel design, ABT exhaust systems and rear mufflers always put on an impeccable performance.

ABT SPORTS WHEELS

Elegant or dynamic, modern or classical, silver or titanium – but always professionally balanced down to the last detail as far as weight and handling are concerned – ABT sports wheels perfectly round off the individual performance of your car. After all, they clearly show at a glance that they conform with the highest of demands both on the road and on the racing track and that they do not only look good but also want to be driven.
